ABOUT CHICODE

ChiCode's mission is to enable millions of children and young adults, especially in developing countries, by exposing them to the most powerful coding languages, Python, Java, and more, free of charge.

COURSES

ChiCode will provide free online courses in Python and Java. Weekly, a lesson recording will be published by the mentors at ChiCode along with practice exercises supplementing the lessons. ChiCode will have personal meetings set up with students who need questions clarified based on the previous lessons. At the end of the course, ChiCode will hold a competition awarding the students who performed well.

WHY SPONSOR CHICODE?

By sponsoring Chicode, you will allow more students access to resources to help them further their interest in computer science. ChiCodeis planning on investing in its students by using the sponsorships to provide technological resources to its students. Due to the COVID 19 pandemic, ChiCode will be initially investing these funds in helping civilians in developing countries to be better equipped to stay safe during the pandemic by donating masks, hand sanitizers, and more.

HOW CAN I HELP?

- **Donate Money**: The money that will be donated will help in making civilians in developing countries better equipped to stay safe during COVID-19.

- **Sponsor Prizes:** ChiCode will award the students who perform well in the competition held at the end of the course

SPONSORSHIP TIERS

	BRONZE $50-$400	SILVER $401+
